Subject: HMCS Haida Home Page
Message-ID: <Chameleon.4.01.2.970302001124.jproc@jproc.bellglobal.com>

Dear BA'ers,

About 18 months ago, I asked this group for tips on how to get started with HTML. I received a lot of useful advice and a few resources that I required all materialized about 4 weeks ago. As a result of this, I've been able to produce a home page for HMCS Haida. There are still few photos to install and some on-line proof reading, but it's almost done. The URL is:

<http://www3.sympatico.ca/hrc/haida>

One device that I have featured is the KWR37 on-line crypto receiver. This is accessible from the Radio Room page (hypertext- 'decoded'). This is the first time that a photo and a story appear adjacent to each other to the best of my knowledge. In the next week, I will likely do the same with the KL7 off-line crypto unit. The very last page has links to at least 8 other naval sites for those of you who are interested in that area. One link points to Bletchley Park. More material will be added in the future, so you may want to note the 'last updated' date.

Regards,

Jerry Proc VE3FAB
